IEEE INSPEC SPI Other _____

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Abstract (Basic): US 20020161605 A1

NOVELTY - A subset of prestored physician credentialing information required by a selected provider application format is automatically input into a provider application form associated with the selected format, followed by selective generation of the particular provider application format. Physician data is stored in a database .

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for physician credentialing system.

USE - For selectively generating different provider application forms based on a common set of physician credentialing information, for physicians and health care professionals.

ADVANTAGE - Reduces the time, cost and risk of error involved in the repetitive task of completing individualized application forms for credentialing and recredentialing of physicians and other health care professionals required by the various health organizations with which they are, or desire to become, affiliated.

DESCRIPTION OF DRAWING(S) - The figure shows a high-level data flowchart illustrating the physician credentialing process.

Overview

Vision Pro Enterprise supports multiple sites and entities with the ability to track specific information, such as privileges, via the intranet or internet. Vision Pro Enterprise also includes integration tools for importing and exporting data to disparate systems throughout a facility, including billing and accounting applications. Vision Pro Enterprise is ideal for small-to-large multi-facility hospitals, managed care organizations and IDN's.

Target Market

Enterprise Credentialing software for small to large multi-facility hospitals, managed care organizations and IDN's.

Additional Features & Functionality

ScreenBuilder™

"One-Size-Fits-All" does not work in the software business. That's why GetProof's Vision Professional credentialing software can be enhanced and customized to meet your unique and expanding needs. Whether you're modifying existing screens or creating new ones, our ScreenBuilder™ technology allows you to customize screens exactly the way you want them. Add fields, modify screen order, or develop brand new screens and fields.

QuickFind™ Reporting

QuickFind™ Reporting provides fast access to physician information. Pull information from any field on any screen and push it out to documents or to Excel for accurate, instant reports.

Auto-Fill Phy App

It's time to give your pen and paper the boot! Auto-populate your custom insurance forms with real-time provider information using our Physician Application tool. Your credentialing applications will be scanned and coded to pull the information you need directly from your database. Fast. Accurate. Simple.

Peer Review Module

Tracks Peer Review by physician, indicators, and reviewing body. Reports may include findings, conclusions, recommendations, actions, and follow-up.

CME & Meeting Tracking

Maintain meeting attendance and CME credits for each physician within the system. The meeting manager includes On-site or Off-site Function Tracking, an Automatic Meeting Scheduler for future meetings, Auto-Fill Sign-In Sheets. Report on your Meeting functions complete reporting Complete Reporting.

Import/Export Interface

With an interface engine and custom integration tools, Vision can be easily integrated with other external hospital systems. With our push-pull technology, you can push your physician data from Vision to other systems or pull physician data into Vision from other applications.

Custom Integrations

With our push-pull technology, you can push your physician data from Vision to other systems or pull physician data into Vision from other applications. Integrate with a Document Management solution or with other external hospital applications for facilitated data sharing.

Paperless CVO Services

GetProof offers accredited CVO services for both JCAHO and NCQA. Credentialing information can be digitally uploaded into Vision, once the file is complete.

HL-7 Interface

The Vision HL-7 export file includes as "standard" most items that are normally part of the physician master file update but other fields will need to be modified and customized for each client. The data is placed in an ASCII file with HL-7 format codes in a designated location. File size is relatively small and updates can be performed quickly with minimal processor time.

Scanning and Image Import

The Vision HL-7 export file includes as "standard" most items that are normally part of the physician master file update but other fields will need to be modified and customized for each client. The data is placed in an ASCII file with HL-7 format codes in a designated location. File size is relatively small and updates can be performed quickly with minimal processor time.

Audit Trail

With Vision's Audit Trail capabilities track all additions and deletions performed by each user within the system. This feature can be turned on or off through system settings and will record user identification numbers, date, time, table, practitioner and screens affected.

Alerts & Notifications

Vision Pro has automatic alerts and alarms to notify you of upcoming expiration dates.

Global Update Utility

This tool allows users to update the following data elements in groups rather than individually: State license,

Malpractice Insurance, DEA License, Board Certification, State CES, other Certifications, Initial Approval, Re-credentialing, and Status Update. For example, update all Texas State Licenses for all physicians who are in the re-credentialing process.

Price

GetProof offers customizable Physician Information Management solutions. Call today for a quote tailored to your organization.

Available Discounts

If you are a participating Amerinet member, please contact a GetProof Account Executive for special discount pricing.

Contact Sales Today

Caredata.com Launches Online Credentials Verification Services
BUSINESS WIRE
September 22, 1999
JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 544

ATLANTA--(BW HealthWire)--Sept. 22, 1999--

PrimeSourceWeb gives hospital, health plan professionals round-the-clock access to the industry's largest credentialing **database**

Caredata.com (Nasdaq/NM:CDCM), a leading healthcare intelligence provider and internet content destination, announced today the launch of PrimeSourceWeb, a Web application that enables real-time, online access to credentialing information and **verification** of healthcare providers' credentials.

The Caredata.com Credentialing Group, formerly Sweetwater Health Enterprises, is a certified Credentials **Verification** Organization (CVO) that offers a range of products, from online **verification** to comprehensive outsourcing services. **Verified** credentials information is used by hospitals and health plans to evaluate potential network providers and is required to help healthcare organizations meet credentialing requirements for accreditation.

PrimeSourceWeb cost-effectively reduces the time it takes to **verify** healthcare providers' credentials from months to days. Using a secured site protocol, **subscribers** can now work with credentialing information from any computer with Internet access. PrimeSourceWeb offers users a great amount of freedom when accessing the credentialing **database** by eliminating cumbersome paper handling and maximizing credentialing staff efficiency.

PrimeSourceWeb interfaces directly with Caredata.com's existing provider data management software. The information contained in the PrimeSourceWeb **database** is continually refreshed using more than 150 data sources that meet NCQA, URAC and JCAHO accreditation standards. This gives healthcare organizations access to the most **current** and accurate information available.

"This is a tremendous leap forward in terms of simplifying and streamlining the primary source **verification** process," said Marsha Ballard, Credentialing Group General Manager. "Providers' credentials can be more quickly **verified**, enabling the professional to be immediately accepted into a healthcare network where he or she can begin caring for patients."

About Caredata.com

Caredata.com is a leading provider of digital healthcare intelligence to drive decision-making by businesses and consumers. Through the Internet and other channels, Caredata.com's commercial customers use its products and services to search the Web for healthcare content, make objective comparisons of the financial costs and clinical outcomes of physician services, analyze the supply of and demand for healthcare services, assess consumer satisfaction with health plans, and **verify** the background and **credentials** of **physicians**.

These capabilities assist healthcare industry participants with clinical research, strategic planning, effective contracting, improving the delivery of care, and increasing profitability. The company has content partnerships that include WebMD, Healtheon, DoctorDirectory.com, Physician.com, Synetic/Medical Manager, HealthGate, HealthStreet and

Medibuy. Caredata.com is headquartered in Atlanta, GA. The company can be found on the Internet at www.caredata.com.

**Caredata.Com Releases Enhanced Online Credentialing Application Service
For Physicians At MGMA Annual Conference**
BUSINESS WIRE
October 18, 1999
JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 987

ATLANTA--(BW HealthWire)--Oct. 18, 1999--
appSTAT allows physicians to easily and securely
complete multiple applications online
Caredata.com (NASDAQ/NM: CDCM), a leading healthcare intelligence and
Internet content provider, today announced the release of appSTAT, the
advanced, Internet version of the original appSTAT **credentialing**
application solution for **physicians** and group providers.

The new Web-based version of appSTAT allows physicians and group
providers to quickly complete multiple managed care or healthcare
organization applications. **Subscribing** healthcare providers enter their
information once into a universal data set on appSTAT's secure Internet
site. When an application needs to be submitted, the provider logs onto
appSTAT and selects the appropriate credentialing application. appSTAT
boasts one of the most complete and extensive libraries of managed care
applications available.

"The addition of appSTAT to our Web storefront further enhances our
family of online healthcare solutions and supports our initiative to build
the Caredata.com brand," said Mark Kaiser, chairman and CEO of
Caredata.com. "With the ability to complete often lengthy credentialing
applications with the click of a mouse, providers can now significantly
improve productivity of their administrative staff."

Caredata.com's Provider Information and Credentialing Group is the
largest certified Credentials **Verification** Organization (CVO) in the
United States and offers a range of products, from online **verification** to
comprehensive outsourcing services. Caredata.com also offers an impressive
array of physician **databases** and software products to support in-house
credentialing operations and provider data management.

Verified credentials information is used by hospitals and health
plans to evaluate potential network providers and is required to help
healthcare organizations meet credentialing requirements for accreditation.

"appSTAT is a timely device for busy practitioners who can appreciate
a secure site to store and submit credentials to requesting parties and
it's easy and convenient to use," said Joseph V. Boykin, Jr., M.D. with the
Institute for Plastic and Reconstructive Surgery in Richmond, Va. "It's
helping me to be more self-sufficient in organizing my credentials."

A variety of organizations recognize the benefits of appSTAT and are
already using it to streamline the **credentialing** process. **Physician**
groups license appSTAT to save their staff valuable time and eliminate
unnecessary paperwork. By pairing appSTAT with Caredata.com's PrimeSource
physician **database**, provider organizations are able to improve their
application processing time. Many leading online healthcare portals have
also entered into agreements with Caredata.com to make the application
available through their sites.

For more information on appSTAT, go to booth #727 at the MGMA Annual
Conference; visit www.caredata.com or call Caredata.com at 800-955-5056.

Caredata.com Partnership With TIPAAA Empowers Independent Physician Associations
BUSINESS WIRE
March 23, 2000
JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 979

ATLANTA--(BW HealthWire)--March 23, 2000--
Caredata.com's tools and services help
Independent Physician Associations conduct business
efficiently and access critical healthcare information
Caredata.com (Nasdaq/NM: CDCM), a leading online syndicator of
healthcare content and applications, today announced a multi-faceted
co-branded marketing agreement with The IPA Association of America
(TIPAAA), the country's leading trade association serving
Independent/Integrated Physician Associations (IPAs).

Through the syndication agreement, announced to members in conjunction
with TIPAAA's annual conference in Las Vegas, Caredata.com will provide
nearly a quarter of a million physicians with four **fee based** products
and services designed to complement their existing TIPAAA resources and
allow them to operate more effectively.

TIPAAA members will be given access to appSTAT, Caredata.com's
credentialing application tool. With appSTAT, members will be able to fill
out one managed care application and apply it simultaneously to multiple
health networks, saving a tremendous amount of administrative time and
cost. TIPAAA's 880-member organization also will have access to Caredata's
co-branded PractiQual Risk Assessment Survey, which helps physicians and
other healthcare professionals identify potential issues within their
practices, evaluate their situations and analyze the deficiency, thereby
assisting them in the design of an action plan for improvement.

"Our partnership with TIPAAA arms the independent physician with the
resources that are essential to gain insight into critical healthcare
information and improve efficiencies within his or her practice," said O.B.
Rawls, Executive Vice President-Operations. "With the vast amount of
healthcare information available, it is important for physicians to know
they are getting their resources from an established, reliable source at a
cost that does not strain their budget."

TIPAAA members will also be able to utilize Caredata.com's
HealthcareMatch.com to search job listings, post resumes, read the latest
articles on the healthcare job market or participate in a chat room. In
addition, members will be able to access Citeline.com, Caredata.com's
medical web research tool. Members will be able to search for healthcare
information in a **database** of sites that have been prescreened for
reliable and accurate content, cutting down on wasted time and the
frustration of scanning through irrelevant listings.

"Caredata.com's applications will enhance the resources we offer our
member organizations," said Albert Holloway, TIPAAA President and CEO.
"These tools will allow practitioners more time to devote to other aspects
of their practice--most importantly, the care of their patients."

About TIPAAA

The IPA Association of America (TIPAAA) is the country's leading trade
association serving Independent/Integrated Physician Associations (IPAs).
Founded in 1994 in Oakland, Calif., TIPAAA provides a wide range of
products, services, and educational programs designed to help IPAs operate
effectively and successfully in managed care. The organization has grown
rapidly in recent years, and now counts more than 880 IPAs--including many

of the nation's leading physician-directed organizations--among its membership. In recognition of the regional nature of health care delivery, TIPAAA is organized on a state chapter basis. The association **currently** has chapters in 36 states, representing 249,000 physicians.

About Caredata.com

Caredata.com is a leading online syndicator of healthcare content and applications to a wide range of Internet portals and e-commerce sites. The company enables Web sites to enhance their content offerings by delivering Caredata.com's award-winning, co-branded tools to their established online communities. These syndicated tools and services empower physicians, consumers and healthcare enterprises to gain insight into critical healthcare information and conduct business more efficiently. Caredata.com's Web applications include its CiteLine(TM) medical search tool, appSTAT(TM) universal healthplan application, myPhysicianSelector(TM) and myHealthPlanSelector(TM) consumer reference tools, HealthcareMatch.com/PracticeMatch(R) job community and PrimeSourceWeb(TM) **physician credentials database**.

Caredata.com has more than thirty strategic partnerships and alliances with leading Web businesses, including adam.com; Alternative MD; ChoicePoint Services; Risk Management Solutions.com; ConsumerLab.com; DoctorDirectory.com; FutureHealth Holding; Healtheon/WebMD; HealthExchange.com; HealthGate; Heritage Information Systems; ID Certify; MedCAREERS; MedAscend; Medibuy; Medicare Services.net; Medical Manager; MediRegs; Physician.com; physiciansite.com; ProxyMed.com; QualVal Systems; qd.online; Salus Media; Spring-Chicken; Urgentlink; VortexMed.com, and Wavelength 555. Caredata.com is headquartered in Atlanta, Ga., and can be found on the Internet at <http://www.caredata.com>.

Certain statements in this press release, particularly those anticipating future financial performance, business prospects, growth and operating strategies, strategic Internet relationships such as syndication partners, sources of revenue and similar matters, and those modified by the words "believes," "expects," "anticipates," "intends," "estimates" or similar expressions, constitute "forward-looking statements" within the meaning of federal securities laws. These forward-looking statements reflect management's expectations and are based upon **currently** available information. These statements are not guarantees of performance and are inherently subject to risks and uncertainties, many of which cannot be predicted or anticipated. Future events and actual results, financial or otherwise, could differ materially from those expressed in or implied by the forward-looking statements. Important factors that could cause future events or actual results to differ materially include: demand for the company's products; the length and unpredictable nature of the company's sales cycle; the timing of significant new customer contracts; the loss or non-renewal of significant customer contracts; the timing of acquisitions; the process of integrating acquired businesses, including the difficulties of integrating geographically dispersed operations, new personnel and new management information systems and the associated distraction of management's attention from day-to-day operations; the number and timing of new strategic Internet relationships such as syndication partners; a reduction in the amount or quality of the company's sources of data; adverse changes in economic conditions in the healthcare information and technology markets; competition from other healthcare information and technology companies; and other risks identified from time to time in the company's reports filed with the Securities and Exchange Commission, including but not limited to the company's annual report on Form 10-K for the year ended December 31, 1998 and quarterly reports on Form 10-Q for the quarters ended March 31, 1999, June 30, 1999 and September 30, 1999. Copies of such filings are available upon request from Caredata.com, Inc.'s investor relations department.

Caredata Announces Seven Strategic Relationships; Implements Content Syndication Strategy

BUSINESS WIRE

October 04, 1999

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 935

ATLANTA--(BW HealthWire)--Oct. 4, 1999--Caredata.com, Inc. (Nasdaq/NM: CDCM), a leading healthcare intelligence and Internet content provider, announces today at the 5th Annual SunTrust Equitable Securities Healthcare Conference that it has recently completed seven new strategic relationships designed to broaden the syndication of its proprietary content and applications via the Internet. Financial terms of the transactions were not disclosed.

"We are pleased that the continued implementation of our syndication strategy has produced alliances and investments with some of the most exciting and cutting-edge companies in the digital healthcare space," said Mark A. Kaiser, chairman and chief executive officer of Caredata.com. "Building strategic Internet business relationships, developing a consolidated Web storefront and strengthening the Caredata.com brand have been our top three priorities for 1999. The agreements highlighted today are consistent with all three initiatives and should broaden the deployment of Caredata.com's content and applications, resulting in a strengthening of our leadership position within the digital healthcare marketplace."

Highlights of the new relationships include:

-- A relationship with adam.com, Inc. (Nasdaq: ADAM), the leading source for online medical and health information, to provide adam.com information from Caredata.com's health plan satisfaction surveys and PrimeSource physician **database**, as well as an agreement allowing adam.com, Inc. to assist us in distributing Caredata.com's CiteLine healthcare vertical search engine. In addition, the adam.com award-winning medical Encyclopedia will be co-branded on Caredata.com's Web site.

-- A content syndication transaction and equity investment with ID Certify, Inc. which will team Caredata.com with ID Certify's electronic digital signature technology or Public Key Infrastructure ("PKI"). Coupled with Caredata.com's PrimeSource **database** to authenticate and **verify** the identity of physicians over the Internet, this technology can make the online prescriptions business totally electronic. The resulting process can be used to satisfy mandated HIPAA requirements concerning the transmission of medical records, privacy, and the reduction of fraud and abuse in the electronic claims process. This is an excellent example of how Caredata.com can imbed its content into a totally electronic/Internet business process.

-- A content syndication transaction and equity investment with Salus Media, Inc. to provide Caredata.com content to enterprises and consumers via Salus Media's patented, interactive personal portal. Salus Media is using broadband technology to merge high-quality medical and lifestyle content with Hollywood-level entertainment.

-- A syndication transaction with qd.online, America Online's medical and lifestyle community for physicians. qd.online will provide its **subscribers** access to appSTAT, Caredata.com's one-time, universal online health plan application for physicians, as well as promote a number of Caredata.com's other information-based products and services.

-- Product co-branding and syndication transactions with Physician.com to provide its physician audience with Caredata.com's CiteLine healthcare vertical search engine and HealthcareMatch physician job opportunity Web site.

-- A product syndication transaction with physiciansite.com to distribute Caredata.com's appSTAT, its one-time, universal online health plan application for physicians.

-- A product co-branding syndication transaction with InHealthBiz, a new healthcare Internet portal targeting healthcare administrators. The portal will be launched in the fourth quarter of 1999. InHealthBiz will co-brand Caredata.com's HealthcareMatch.com physician job opportunity Web site as well as Caredata.com's CiteLine healthcare vertical search engine.

About Caredata.com

Caredata.com is a leading provider of digital healthcare intelligence to drive decision-making by businesses and consumers. Through the Internet and other channels, Caredata.com's commercial customers use its products and services to search the Web for healthcare content; make objective comparisons of the financial costs and clinical outcomes of physician services; analyze the supply of and demand for healthcare services; assess consumer satisfaction with specific health plans, providers, and pharmacies; and **verify** the background and **credentials** of **physicians**.

These capabilities assist healthcare industry participants with clinical research, strategic planning, effective contracting, improving the delivery of care, and increasing profitability. Content partnerships include adam.com, DoctorDirectory.com, Healtheon, HealthGate, HealthStreet, ID Certify, Medical Manager, Medibuy, Physician.com, physiciansite.com, qd.online, Salus Media, and WebMD. Caredata.com is headquartered in Atlanta, GA. The company can be found on the Internet at www.caredata.com.

The information in this press release contains "forward-looking statements" as such term is defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect management's expectations and are based upon **currently** available data. These statements are not guarantees of performance and are inherently subject to risks and uncertainties, any of which cannot be predicted or anticipated. Future events and actual results, financial or otherwise, could differ materially from those contained herein. Important factors that could cause the actual results to differ materially from Caredata.com, Inc.'s expectations are listed from time to time in Caredata.com, Inc.'s reports filed with the Securities and Exchange Commission, including but not limited to Caredata.com, Inc.'s annual report on Form 10-K for the year ended December 31, 1998. Copies of such filings are available upon request from Caredata.com, Inc.'s investor relations department.

Medirisk to Acquire Citizen 1 Software, Inc.; Changes Name to Caredata.com; Announcement Signals Accelerated Expansion Into Internet Marketplace
BUSINESS WIRE
June 04, 1999
JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 1327

ATLANTA--(BW HealthWire)--June 2, 1999--Medirisk, Inc. (Nasdaq/NM:MDMD) today announced that it has entered into a definitive agreement to acquire San Francisco-based Citizen 1 Software, Inc. The acquisition reflects the Company's evolution into a leader in the digital healthcare marketplace and serves as the catalyst for a corporate name change to Caredata.com, Inc. The corporate name change from Medirisk, Inc. to Caredata.com, Inc. is effective immediately. In addition, effective the morning of June 21, 1999, the Company's common stock will switch to trading under its new symbol "CDCM" on the Nasdaq National Market.

Citizen 1's suite of tools organizes the Internet's broad base of healthcare content, allowing efficient access to the most relevant information and avoiding the clutter and confusion created by the multitude of Web sites. Supported by an editorial staff and sophisticated search technology, Citizen 1 offers its advanced Web research capabilities via a free, consumer-based version at www.citeline.com, while premium Internet and intranet versions are used by healthcare industry researchers on a **subscription** basis. Premium versions of CiteLine offer notification of content changes and dramatically improve research productivity by allowing simultaneous searches of the "invisible" Web **databases**, repositories of content which are typically reachable only through a particular site's own search engine.

Sweetwater Health Enterprises Hosts Annual Client Conference
PR NEWSWIRE
May 12, 1999
JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 360

Conference Provides Valuable Information and Insight For Industry Professionals

ATLANTA, May 12 /PRNewswire/ -- Sweetwater Health Enterprises(R), the nation's largest credentials **verification** organization kicked off its fifth annual client conference yesterday in Las Vegas.

SUGAR99 is a two and a half-day conference, serving Sweetwater's existing software users and clients -- healthcare industry professionals seeking opportunities to maximize their organizations' effectiveness in provider data management and credentials **verification**.

This year at SUGAR99, Sweetwater introduces three new additions to its product line. LUCI(TM), Sweetwater's state-of-the-art provider data management software, stores and enables complex processing of healthcare provider relationships; PrimeSource Web, a powerful Web-based databank and provider credentials **verification** system; and appSTAT(TM) Sweetwater's time-saving online physician **credentialing** application. Using appSTAT **subscribing physicians** enter their **credentials** once then select from a library of credentialing applications

"Each of our new applications provide **credentialing** clients and **physicians** significant time and cost savings," says Sweetwater Vice President of Marketing Cherie Holmes Henry.

SUGAR99 offers more than 30 educational sessions and labs, focusing on healthcare quality management and credentials **verification**. The conference brings together technology specialists, accrediting organization representatives, managed care strategists and healthcare professionals to explore innovations and industry trends with Sweetwater clients.

Credentialing information is used by hospitals and health plans to evaluate potential network providers, track and improve healthcare quality and help healthcare organizations meet credentialing requirements for accreditation.

Sweetwater Health Enterprises, Inc., is the largest credential **verification** organization, providing data, software, and services to build and manage provider networks. Sweetwater helps hospitals and managed care organizations adapt to the rapidly changing managed care environment by supplying industry-leading **database** products and quality management software, provider data, CVO services and managed care consulting.

Sweetwater is a subsidiary of Medirisk, Inc., a leading provider of proprietary **database** products, decision support software and analytical services to the healthcare industry. For more information, contact Cherie Holmes Henry at 972-888-5638.

Medirisk Announces Alliance With WebMD; Expands Marketing of Healthcare Information to Internet

BUSINESS WIRE

March 03, 1999

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 651

ATLANTA--(BW HealthWire)--March 3, 1999--Medirisk, Inc. (Nasdaq/NM:MDMD), a leading provider of proprietary **database** products, decision-support software and analytical services to the healthcare industry, today announced an Internet content and re-marketing agreement with WebMD, a leading full-service Internet healthcare portal.

Under the content agreement with WebMD, Medirisk will provide tools to measure clinical and financial performance, **physician credentialing** and recruiting services and healthcare-related marketing and planning products, such as market-specific **databases** of demographic information, incidence of disease, market demand for services, supply of providers and health plan member satisfaction indicators. These tools will help WebMD's physician **subscribers** improve practice management, reduce administrative costs and increase profitability.

Mark A. Kaiser, Medirisk's chairman and chief executive officer, said, "We see our information and products as a valuable component of the WebMD portal. We are excited about this strategic relationship and believe it will play an important role in helping us broaden our delivery of business solutions to physician practices and other healthcare organizations.

"We are strongly committed to using the Internet not only to expand our third-party distribution but also to enhance our product offerings. We believe consumerism in healthcare and the quest for answers and information on the Internet has the potential for extending the market opportunities and possible uses of our various products."

Jeffrey T. Arnold, chairman and chief executive officer of WebMD, said, "We are excited by the opportunity to work with Medirisk because they offer information, analytical tools and services specifically geared to helping healthcare professionals make better strategic, operational and financial decisions -- all with the goal of improving the delivery of care. In conjunction with the suite of innovative online services we already offer healthcare professionals, the Medirisk offering represents one more step that WebMD has taken to make our service the premier administrative and information tool that healthcare professionals can integrate into their daily routine."

Medirisk, Inc. (www.Medirisk.com) is a leading provider of proprietary **database** products, decision-support software and analytical services to the healthcare industry. The Company's products and services enable its customers to make objective comparisons of the financial costs and clinical outcomes of physician services to customer-specific and industry benchmarks, analyze the supply of and demand for healthcare services, assess member satisfaction with specific managed care plans and obtain information concerning the background and **credentials** of **physicians**. These capabilities assist healthcare industry participants in strategic planning, effective contracting and improving the delivery of care. Medirisk's corporate headquarters are located in Atlanta, Georgia.

Launched October 5, 1998, WebMD, Inc. (www.WebMD.com) offers a comprehensive suite of Internet-based services for physicians, including a premier medical information library; a virtual office with real-time insurance **verification** and referral authorizations, unified messaging and

telephone-based patient test results; customized Web sites for physician practices; competitively priced supplies and hundreds of continuing medical education courses. Its separate consumer Web site offers a broad range of premium branded content and services designed to allow Internet users to take charge of their health and to access healthcare professionals, resources and communities.

This press release, particularly the statements by Mr. Kaiser, includes forward-looking statements related to Medirisk that involve risks and uncertainties including, but not limited to, quarterly fluctuations in results, the management of growth, market acceptance of certain products and other risks. These forward-looking statements are made in reliance on the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. For further information about factors that could affect Medirisk's future results, please see the Company's filings with the Securities and Exchange Commission. Prospective investors are cautioned that forward-looking statements are not guarantees of future performance. Actual results may differ materially from management expectations. Copies of the filings are available upon request from Medirisk's investor relations department.
